More Accurate Tracking

Clients know their product is the freshest possible including time and temperature tracking using proven RFID technology – instant printed readout in the field.

Ship 24% More Product

More space available so you can increase your net shipping weight by 24% (compared to current industry containers). Increase net shipping volume up to 49%.

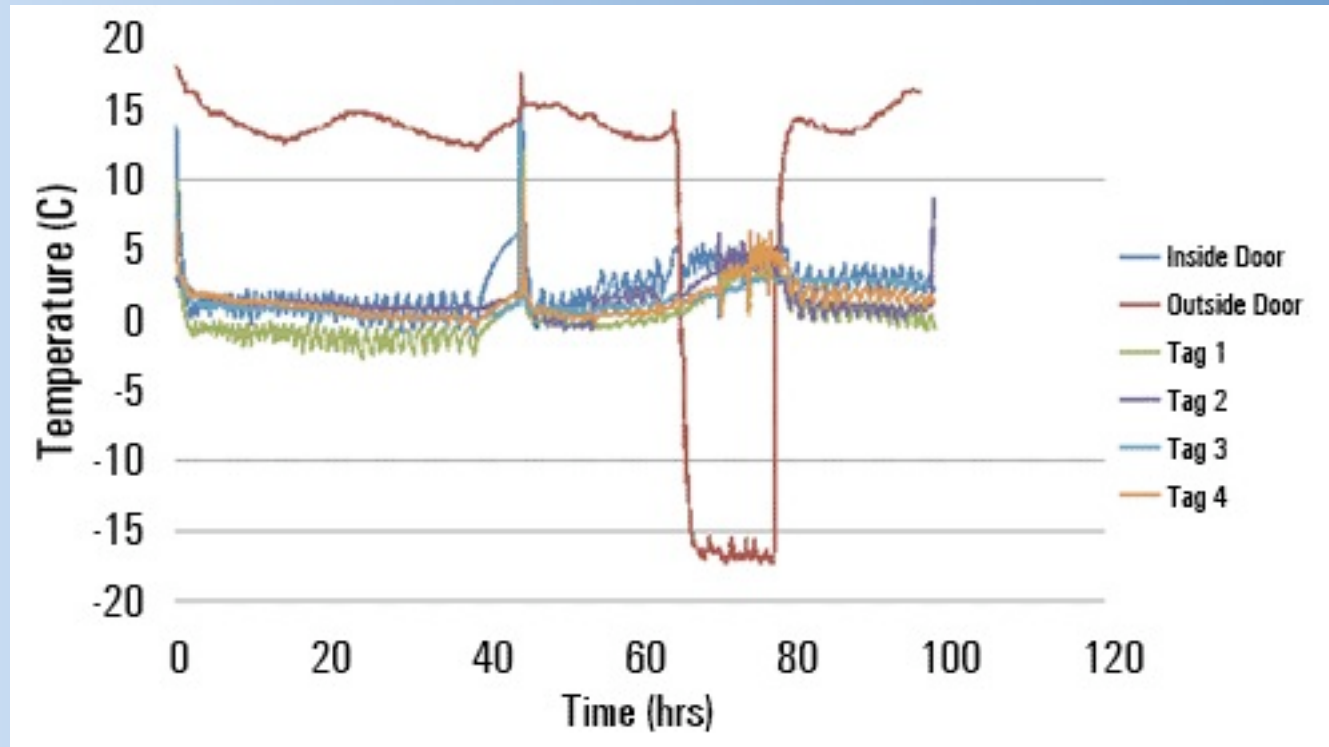

Stays Fresher Longer

Active cooling system holds temperatures within +/- 2°F in excess of 110 hours without recharging, or indefinitely while plugged in. May be recharged using 110 or 220 VAC wall plug-in, or using separate DC charger.

Heater Testing in the Freezer

Aircraft Test #1

Round temperature reader indicated +38°F (+3.33°C) after 3 hours and 22 minutes of the flight Anchorage – Emmonak and waiting time on a ground while TEDSBOX® was turned off
